Technical Data Sheet Issue: 28-09-2015

## HYDROPOX F

Properties:	HYDROPOX F is a 2-component epoxy resin fine mortar (PC mortar) for repainterior and exterior concrete surfaces.			
	Due to its specific grading curve HYDROPOX F can be applied as a fine filling compound.			
	The particular material basis of <i>HYDROPOX F</i> makes application even on sl moist subsurface possible.			
Technical data:	<u>Substance data of components:</u> Component A Consistency Colour Odour Bulk density (23°C) Dyn. viscosity (23°C)	highly viscous grey characteristic approx. 1.67 g/cm <sup>3</sup> not applicable	DIN EN 1015-6 DIN EN ISO 2555	
	<i>Component B</i> Consistency Colour Odour Spec. density (23°C) Dyn. viscosity (23°C)	liquid light yellow similar to amine approx. 0.99 g/cm <sup>3</sup> approx. 20 - 40 mPas	DIN EN ISO 2811-1 DIN EN ISO 2555	
	<u>Mixture of A- and B-component:</u> Processing temperature Density of mixture (23°C)	10 - 30°C approx. 1.92 g/cm <sup>3</sup>	substrate temperature DIN EN 1015-6	
	<u>Reaction data (at 10°C):</u> Pot-life Dust-dry Foot traffic Mechanical loads Completely cured	approx. 105 min approx. 4 h approx. 23 h 6 d 7 d		
	<u>Reaction data (at 20°C):</u> Pot-life Dust-dry Foot traffic Mechanical loads Completely cured	approx. 60 min approx. 3.5 h approx. 15 h 5 d 7 d		
	<u>Reaction data (at 30°C):</u> Pot-life Dust-dry Foot traffic Mechanical loads Completely cured	approx. 45 min approx. 3 h approx. 8 h 5 d 7 d		
	<u>Properties of PC mortar (at 23°C/</u> Compressive strength 1 d 7 d	<u>750 % rel. humidity):</u> approx. 34 N/mm <sup>2</sup> approx. 45 N/mm <sup>2</sup>	DIN EN 12390-3	

	Bending tensile strength 1 d 7 d	approx. 14 N/mm <sup>2</sup> approx. 16 N/mm <sup>2</sup>	DIN EN 12390-5	
	E-modulus	approx. 4000 N/mm <sup>2</sup>	DIN EN 12390-13	
Processing:	The subsurface must be stable and free of separating substances. Insuffice firm layers and concrete slurry must be removed. For this purpose the subsu must be prepared by suitable mechanical processes such as e.g. shot blas milling and subsequent shot blasting or blasting with other hard blasting abrasives.			
	HYDROPOX F is supplied in a set defined mix-ratio of components (A : B). For the processing, the B component (hardener) is completely filled into the A component (resin mixture) and homogenously mixed by means of a slowly moving stirring device (max. 60 rpm) until an uniformly grey colouring is produced.			
	Mixing must be carried ou within 60 minutes (at 20°C	e carried out for at least 3 minutes. The mixture must be used up es (at 20°C).		
	Surfaces should be treated with HYDORPOX EPG immediately prior to applying HYDROPOX F. HYDROPOX F should be applied in a thick layer with a flat end trowel over the freshly treated surfaces and worked in well.			
Safety information:	HYDROPOX F component A contains epoxy resin. HYDROPOX F component B contains amines. Both components are classified as hazardous according to Regulation (EC) 1272/2008 (CLP).			
	It is therefore necessary, before beginning processing, to become familiar with the precautions and safety advice as indicated in the material safety data sheet.			
Packaging:	Combined packaging	10 kg combined meta 30 kg combined meta		
	Bigger packaging on request.			
			original packaging when stored in dry , protected from heat, frost and direct sunlight.	
	After the expiration the use of the product is generally not recommended, unless an approval has been provided by TPH. This approval can only be obtained by the quality assurance department of TPH releasing the material after verification of main properties being within specification.			
Disposal:	Small quantities of cured product residues can be disposed of as normal domestic waste. Dispose of not cured product components must be effected in accordance with the corresponding local regulations. For further information please refer to the material safety data sheets.			
Test certificates:	Determination of setting t	ime at different temperatures	; TPA GmbH 2008	
	HYDROPOX F - Test of reaction-bonded repair mortar (PC) according to Guideline of concrete repair of the German Committee for Reinforced Concrete, part 2, section 4.4; MFPA Leipzig 2010			

Legal notice:

The correct and thus successful application of our products is not subject to our control. A guarantee can be issued for the quality of our products within the framework of our sales and supply conditions, however not for successful processing. All data and specifications in this specification sheet are based on the present state of the art and the right to changes and adaptations for the sake of development remains explicitly reserved. The consumption specifications designated by us can be only average empirical values, where deviations are possible on an individual basis and therefore cannot be excluded by us.
